OBJECTIVE

Highly motivated Artificial Intelligence & Machine Learning student seeking to leverage hands-on experience in computer vision, deep learning, and predictive modeling. Eager to contribute to dynamic teams by building efficient, real-time AI solutions and scalable machine learning pipelines.

EDUCATION

B V Raju Institute of Technology (BVRIT)
B.Tech — Artificial Intelligence & Machine Learning

Narsapur, Telangana
2024-2028

Sri Chaitanya Junior College
Intermediate

Hyderabad, Telangana
2022-2024

PROJECTS

Jarvis – Offline AI Voice Assistant | *Python, Speech Recognition, OS Automation* Jan 2026 – Present

- Built an offline AI voice assistant pipeline consisting of wake-word detection, speech recognition, and command execution
- Implemented utterance-level RMS energy analysis to accurately detect speech boundaries, reducing response latency
- Designed a finite-state listening system to reliably manage wake, active listening, and automated OS-level actions

Dog Breed Classification using CNN | *Python, TensorFlow/Keras, Deep Learning* Sept 2025 – Dec 2025

- Developed an image classification model using Convolutional Neural Networks (CNNs) to identify dog breeds from images
- Preprocessed image data using resizing, normalization, and augmentation techniques to improve model robustness
- Trained and evaluated the model using train/validation splits, analyzing accuracy and loss trends to ensure generalization

TECHNICAL SKILLS

Languages: Python, Java, C, SQL

Machine Intelligence: Supervised Learning, CNNs, Image Recognition, Speech Processing

Frameworks & Libraries: pandas, NumPy, scikit-learn, TensorFlow, Keras, Flask, React, FastAPI

Tools & Core CS: Git, Docker, VS Code, GCP, Data Structures & Algorithms, DBMS

CERTIFICATIONS

NPTEL Online Certification | Programming, Data Structures and Algorithms using Python July 2025 – Sept 2025

Infosys Springboard | Basics of Python May 2025 – June 2025
